Education

GL Bajaj Institute Of Technology And Management — Greater Noida
B.Tech (Computer Science and Engineering) — 2021 - 2025

Experience

Nagarro | Associate Software Engineer — Gurugram | June 2025 - April 2026

- Developed and maintained enterprise applications, implementing business workflows, UI components, data models, and application logic based on business requirements.
- Worked across frontend and backend development, contributing to application enhancements, debugging, testing, and production support in an Agile environment.
- Completed intensive Java full-stack training covering Core Java, Spring Boot, Hibernate, Maven, REST APIs, SQL, Apache Tomcat, and object-oriented programming.
- Collaborated with cross-functional teams to analyze requirements, troubleshoot issues, resolve defects, and deliver application enhancements.

WhatBytes | Frontend Developer Intern — Bengaluru | Jan 2025 - May 2025

- Developed responsive web interfaces using Next.js, React.js, TypeScript, and Tailwind CSS, focusing on reusable and maintainable UI components.
- Integrated frontend applications with backend APIs and optimized application performance to deliver a seamless user experience.
- Collaborated with the development team using Git and modern development practices while leveraging AI-assisted tools to improve productivity.

Skills

Programming Languages:	Python, JavaScript, TypeScript, Java, C++
Libraries / Frameworks:	FastAPI, React.js, Next.js, Node.js, Express.js, Streamlit, Tailwind CSS, React Flow, Spring Boot, Hibernate
Databases:	PostgreSQL, MongoDB, SQL
Developer Tools:	Git, GitHub, Docker, Maven, Apache Tomcat, Postman, REST APIs, AWS, Mendix
AI / Data Tools:	Google Gemini API, LLM Integration, RAG, LangChain, n8n, Pandas, NLTK

Projects

FlowBuilder | Link — *React.js | React Flow | FastAPI | Python*

- Built a visual workflow builder that allows users to create, configure, and connect reusable nodes into processing pipelines.
- Implemented reusable node abstractions and a dynamic Text node with variable detection and configuration.
- Developed a FastAPI backend to receive and process frontend-defined workflows as a DAG, integrating the visual pipeline with backend workflow processing.

Collab Editor | Link — *Next.js | TypeScript | Prisma | PostgreSQL | Google Gemini*

- Developed a collaborative document editor using Next.js, TypeScript, Prisma, PostgreSQL, and Supabase with secure authentication, document management, and version history.
- Integrated Google Gemini API to provide AI-powered writing assistance, including content summarization, grammar correction, rewriting, and action item extraction.
- Designed a responsive dashboard for document organization and deployed the application on Vercel with Supabase-backed PostgreSQL.

AI CSV Importer | Link — *Next.js | TypeScript | Express.js | Google Gemini API*

- Built a stateless AI-powered CSV importer that maps varied CSV column structures into a standardized CRM format using Google Gemini.
- Developed a Next.js App Router frontend and Express.js + TypeScript backend for CSV upload, processing, mapping, and AI-powered transformation.
- Integrated the Gemini API into the backend workflow to intelligently interpret CSV columns and generate structured CRM-compatible data.

Achievements

- Winner, Neuro Nest Hackathon GL Bajaj Institute of Technology and Management
- Achieved a maximum LeetCode rating of 1861
- Achieved a maximum Codeforces rating of 1509
- Earned Microsoft Learn Student Ambassador (MLSA) Certification
