Experience

Nagarro | Associate Software Engineer Gurugram | June 2025 - April 2026

- Developed enterprise web applications by building responsive frontend interfaces, data-driven modules, and business workflows from functional requirements.
- Designed application workflows and client-side logic to automate business processes and streamline user interactions across application modules.
- Worked with PostgreSQL for application data management, configuring data models and implementing database-backed features.
- Collaborated with cross-functional teams on requirement analysis, feature development, testing, debugging, defect resolution, and production support in an Agile environment.

WhatBytes | Frontend Developer Intern Bengaluru | Jan 2025 - May 2025

- Developed responsive web interfaces using Next.js, React.js, TypeScript, and Tailwind CSS, focusing on reusable and maintainable UI components.
- Integrated frontend applications with backend APIs and optimized application performance to deliver a seamless user experience.
- Collaborated with the development team using Git and modern development practices while leveraging AI-assisted tools to improve productivity.

Skills

Languages :	JavaScript, TypeScript, Python, C++
Frontend :	React.js, Next.js, React Flow, Tailwind CSS
Backend :	Node.js, Express.js, FastAPI, REST APIs
Databases :	PostgreSQL, MongoDB, Supabase, Prisma
AI / GenAI :	OpenAI API, Google Gemini API, LLM Applications, Prompt Engineering, NLP
Tools / Platforms :	Git, GitHub, Docker, AWS, Vercel, Postman

Projects

HireFlow AI | Link *Next.js | TypeScript | FastAPI | Python | PostgreSQL | SQLAlchemy | Hunar AI*

- Built an AI-powered hiring platform that transforms job descriptions into **candidate search criteria, screening questions, and structured evaluation schemas** through an automated recruitment workflow.
- Developed a **FastAPI + Python backend** with SQLAlchemy and PostgreSQL to manage jobs, candidates, screening campaigns, call results, and recruiter workflows through REST APIs.
- Implemented explainable candidate ranking using weighted **skill, experience, title, location, and preference matching**, providing recruiters with transparent fit scores and ranking reasons.
- Integrated **Hunar Voice AI** to dynamically generate role-specific voice screening agents from job requirements, conduct consent-first candidate calls, and capture structured screening responses.
- Built a responsive **Next.js + TypeScript** dashboard for candidate sourcing, shortlisting, campaign monitoring, call details, recordings, and CSV exports, deployed with Vercel and Render.

Collab Editor | Link *Next.js | TypeScript | React | Prisma | PostgreSQL | Auth.js | Dexie | Tailwind CSS*

- Built a **local-first collaborative document editor** supporting document creation, editing, sharing, autosave, version history, and restoration, with local changes persisted in **IndexedDB** for reliable offline usage.
- Implemented **role-based access control** allowing document owners to invite members as editors or viewers, update permissions, and enforce access through server-side authorization checks.
- Designed an **offline synchronization system without CRDT libraries** using an operation queue to push local edits, pull remote changes, retry failed requests, and apply deterministic conflict handling.
- Developed the full document lifecycle including **sharing, member management, deletion, version snapshots, and restoration** using Next.js, Prisma, and PostgreSQL.
- Integrated **Auth.js, Prisma, PostgreSQL, and Dexie** with a responsive Next.js/React frontend to provide secure authentication, persistent cloud storage, and local-first document persistence.

Education

GL Bajaj Institute Of Technology And Management Greater Noida
B.Tech (Computer Science and Engineering) 2021 - 2025
